ELECTRICAL COMMUNICATION

VOLUME 40

1965

Published and Copyrighted by the
INTERNATIONAL TELEPHONE AND TELEGRAPH CORPORATION
320 PARK AVENUE, NEW YORK, NEW YORK 10022 U.S.A.

SUBJECT INDEX

	Number	Pages
Adjustable Equalizer, Theory and Design of an. W. Haas	2	225–232
Aerial Branching System Using Interdigital Filters. S. W. Conning	3	352–358
Anniversary of Pulse-Code Modulation, The 25th. E. M. Deloraine and A. H. Reeves	4	421–434
Attenuation and Wire-Braid Design for Flexible Radio-Frequency Cables, Relationship Between. L. R. Spicer	4	487–492
Automatic Postal Check Handling in Germany. K.-H. Klönne	3	328–337
Awards:		
Busignies Receives Electronics Award	1	4
Kurth Receives Papers Award	1	13
Reeves Receives Ballantine Medal	4	434
Ulrich Receives Papers Award	1	13
Banking Applications, Optical Character Readers for Automatic Document Handling in. W. Dietrich	3	312–327
Books:		
Pert Cost	1	33
Maintainability and Reliability Handbooks	1	152
Richtfunkverbindung (Radio Links)	2	241
Branching System Using Interdigital Filters, Aerial. S. W. Conning	3	352–358
Buried Coaxial Cables Struck by Lightning, Estimating Voltage Surges on. J. Kemp	3	381–384
Busignies Receives Electronics Award	1	4
Cables:		
Estimating Voltage Surges on Buried Coaxial Cables Struck by Lightning. J. Kemp	3	381–384
Power-Frequency Induction on Coaxial Cables With Application to Transistorized Systems. J. Kemp, H. W. Silcock, and C. J. Steward	2	255–265
Relationship Between Attenuation and Wire-Braid Design for Flexible Radio-Frequency Cables. L. R. Spicer	4	487–492
Small-Diameter Coaxial Cable Using Moulded-Shell Construction. R. Tatman and B. E. Ash	4	471–486
Carrier Telephone System for Mine Railroads. K. Lindig and E. Rempp	2	215–224
Cassegrain Antenna, Microwave Radio System for Multichannel Telephony and Television in the 6-Gigahertz Range: Part 4—. D. G. Ware and G. Stemp	2	200–208
Characteristics and Applications of Reed Contacts. H. Rensch	3	385–397
Character Readers for Automatic Document Handling in Banking Applications, Optical. W. Dietrich	3	312–327
Check Handling in Germany, Automatic Postal. K.-H. Klönne	3	328–337
Coaxial Cables: See Cables.		
Coding, Modulation and. A. Chatelon	4	461–470
Color Television, Monitor for. R. Deubert and A. Rappold	4	493–499
Computer Assistance to Pentaconta Engineering. A. J. Henquet and G. Le Strat	2	242–254
Deep-Rack Construction (Mark 6 Multiplex), Transistor Carrier Multiplex Equipments: Part 2—. M. E. Collier	1	48–73
Determination of the Probability Distribution of the Number of Secondary Electrons. Z. Bay and G. Papp	1	134–143
Dewline After a Decade of Field Operation and Maintenance. W. G. Donaldson	3	369–380
Distribution of the Number of Secondary Electrons, Determination of the Probability. Z. Bay and G. Papp	1	134–143
Document Handling in Banking Applications, Optical Character Readers for Automatic. W. Dietrich	3	312–327
Electron-Tube Manufacture, Photo-Etching for Reliability in. B. Thomson	2	266–269
Equalizer, Theory and Design of an Adjustable. W. Haas	2	225–232
Estimating Voltage Surges on Buried Coaxial Cables Struck by Lightning. J. Kemp	3	381–384
Etching for Reliability in Electron-Tube Manufacture, Photo-. B. Thomson	2	266–269
Etching of Valdemar Poulsen	2	283
Europe, Telecommunications in Western. E. M. Deloraine	1	14–33
Field Operation and Maintenance, Dewline After a Decade of. W. G. Donaldson	3	369–380
Filters, Aerial Branching System Using Interdigital. S. W. Conning	3	352–358
Flexible Radio-Frequency Cables, Relationship Between Attenuation and Wire-Braid Design for. L. R. Spicer	4	487–492
Flight Simulators, Visual Presentation for. J. Baradat	1	144–148
Front-Leadout Construction, Transistor Carrier Multiplex Equipments: Part 3—. R. Rabe and L. C. Deschuytere	1	74–98
Germany, Automatic Postal Check Handling in. K.-H. Klönne	3	328–337
Haessler, Gerhard. In Memoriam	3	403
Herkons: See Reed Contacts.		

	Number	Pages
Induction on Coaxial Cables With Application to Transistorized Systems, Power-Frequency. J. Kemp, H. W. Silcock, and C. J. Steward	2	255–265
Infrared and the Nimbus High-Resolution Radiometer. R. V. Annable, K. L. DeBrosse, H. A. Leiter, and W. H. Wallschlaeger	4	500–507
In Memoriam: Gerhard Haessler	3	403
Interdigital Filters, Aerial Branching System Using. S. W. Conning	3	352–358
Intermediate-Frequency Amplifiers, Microwave Radio System for Multichannel Telephony and Television in the 6-Gigahertz Range: Part 3—Wide-Band. O. Bettinger	2	192–199
Inventions: See United States Patents.		
Kurth Receives Papers Award	1	13
Laboratoire Central de Télécommunications. H. Tanter and P. Grandry	4	435–449
Lightning, Estimating Voltage Surges on Buried Coaxial Cables Struck by. J. Kemp	3	381–384
Loss, Statistical Method of Analyzing Long-Term Tropospheric. M. Schilder	1	99–108
(**M**ark 6 Multiplex), Transistor Carrier Multiplex Equipments: Part 2—Deep-Rack Construction. M. E. Collier	1	48–73
Microwave Power Sources Using Solid-State Devices. L. Lewin and J. Paine	3	338–351
Microwave Radio System for Multichannel Telephony and Television in the 6-Gigahertz Range:		
Part 1—Basic Features. D. Davidson, G. Dawson, O. Laaff, and M. Müller	2	173–183
Part 2—Solid-State Microwave Power Generators. R. H. Gorringe and J. I. C. Philips	2	184–191
Part 3—Wide-Band Intermediate-Frequency Amplifiers. O. Bettinger	2	192–199
Part 4—Cassegrain Antenna. D. G. Ware and G. Stemp	2	200–208
Part 5—Auxiliary Radio Relay System *BFM24/6000*. A. Liekens and E. Reygaerts	2	209–214
Mine Railroads, Carrier Telephone System for. K. Lindig and E. Rempp	2	215–224
Mismatches and System Noise Figure, Transmission-Line. E. Imboldi	2	233–241
Modulation and Coding. A. Chatelon	4	461–470
Modulation, The 25th Anniversary of Pulse-Code. E. M. Deloraine and A. H. Reeves	4	421–434
Monitor for Color Television. R. Deubert and A. Rappold	4	493–499
Moulded-Shell Construction, Small-Diameter Coaxial Cable Using. R. Tatman and B. E. Ash	4	471–486
Multiplier Phototubes for Single-Electron Counting. E. H. Eberhardt	1	124–133
Nimbus High-Resolution Radiometer, Infrared and the. R. V. Annable, K. L. DeBrosse, H. A. Leiter, and W. H. Wallschlaeger	4	500–507
Noise Figure, Transmission-Line Mismatches and System. E. Imboldi	2	233–241
Obituary: See In Memoriam.		
Optical Character Readers for Automatic Document Handling in Banking Applications. W. Dietrich	3	312–327
Otto Scheller and the Invention and Applications of the Radio-Range Principle. R. I. Colin	3	359–368
Pentaconta Engineering, Computer Assistance to. A. J. Henquet and G. Le Strat	2	242–254
Photo-Etching for Reliability in Electron-Tube Manufacture. B. Thomson	2	266–269
Phototubes for Single-Electron Counting, Multiplier. E. H. Eberhardt	1	124–133
Postal Check Handling in Germany, Automatic. K.-H. Klönne	3	328–337
Poulsen, Etching of Valdemar	2	283
Power-Frequency Induction on Coaxial Cables With Application to Transistorized Systems. J. Kemp, H. W. Silcock, and C. J. Steward	2	255–265
Power Sources Using Solid-State Devices, Microwave. L. Lewin and J. Paine	3	338–351
Probability Distribution of the Number of Secondary Electrons, Determination of the. Z. Bay and G. Papp	1	134–143
Pulse-Code Modulation, The 25th Anniversary of. E. M. Deloraine and A. H. Reeves	4	421–434
Radio-Frequency Cables, Relationship Between Attenuation and Wire-Braid Design for Flexible. L. R. Spicer	4	487–492
Radiometer, Infrared and the Nimbus High-Resolution. R. V. Annable, K. L. DeBrosse, H. A. Leiter, and W. H. Wallschlaeger	4	500–507
Radio-Range Principle, Otto Scheller and the Invention and Applications of the. R. I. Colin	3	359–368
Railroads, Carrier Telephone System for Mine. K. Lindig and E. Rempp	2	215–224
Readers for Automatic Document Handling in Banking Applications, Optical Character. W. Dietrich	3	213–327
Rectifiers in 1965, Selenium. H. P. Hempel	2	270–283
Reed Contacts, Characteristics and Applications of. H. Rensch	3	385–397
Reeves Receives Ballantine Medal	4	434
Relationship Between Attenuation and Wire-Braid Design for Flexible Radio-Frequency Cables. L. R. Spicer	4	487–492
Reliability in Electron-Tube Manufacture, Photo-Etching for. B. Thomson	2	266–269
Scheller: See Otto Scheller.		
Selenium Rectifiers in 1965. H. P. Hempel	2	270–283
Simulators, Visual Presentation for Flight. J. Baradat	1	144–148
Single-Electron Counting, Multiplier Phototubes for. E. H. Eberhardt	1	124–133

	Number	Pages
Small-Diameter Coaxial Cable Using Moulded-Shell Construction. R. Tatman and B. E. Ash	4	471–486
Solid-State Devices, Microwave Power Sources Using. L. Lewin and J. Paine	3	338–351
Solid-State Microwave Power Generators, Microwave Radio System for Multichannel Telephony and Television in the 6-Gigahertz Range: Part 2—. R. H. Gorringe and J. I. C. Philips	2	184–191
Standard Telecommunication Laboratories. J. K. Webb	1	109–123
Statistical Method of Analyzing Long-Term Tropospheric Loss. M. Schilder	1	99–108
System Engineering: Its Approach and Operations. J. W. Halina	4	450–460
Telecommunications in Western Europe. E. M. Deloraine	1	14–33
Television, Monitor for Color. R. Deubert and A. Rappold	4	493–499
The 25th Anniversary of Pulse-Code Modulation. E. M. Deloraine and A. H. Reeves	4	421–434
Theory and Design of an Adjustable Equalizer. W. Haas	2	225–232
Transistor Carrier Multiplex Equipments:		
Part 1—Broad Design and Salient Circuit Features. M. E. Collier, H. Lehnich, and L. C. Deschuytere	1	34–47
Part 2—Deep-Rack Construction (Mark 6 Multiplex). M. E. Collier	1	48–73
Part 3—Front-Leadout Construction. R. Rabe and L. C. Deschuytere	1	74–98
Transmission-Line Mismatches and System Noise Figure. E. Imboldi	2	233–241
Tropospheric Loss, Statistical Method of Analyzing Long-Term. M. Schilder	1	99–108
Ulrich Receives Papers Award	1	13
United States Patents Issued to International Telephone and Telegraph System:		
August 1963–January 1964	1	149–151
February 1964–July 1964	3	398–402
August 1964–October 1964	4	508–511
Valdemar Poulsen, Etching of	2	283
Visual Presentation for Flight Simulators. J. Baradat	1	144–148
Voltage Surges on Buried Coaxial Cables Struck by Lightning, Estimating. J. Kemp	3	381–384
Western Europe, Telecommunications in. E. M. Deloraine	1	14–33
Wire-Braid Design for Flexible Radio-Frequency Cables, Relationship Between Attenuation and. L. R. Spicer	4	487–492
World's Telephones—1964	2	284–290

RECENT ACHIEVEMENTS

Issue number and page appear at left of each listing.

1/11 Acoustic Amplifier
2/160 Air Traffic Control
1/11 Assistant Subscriber Sets Approved in Germany
4/417 Automatic Testing of Long Lines
2/170 Award for Quality of Components for Pershing Missile
4/416 Basildon Plant Opened in United Kingdom
1/8 Battlefield Surveillance Radar
3/310 "British Admiral" Radio Installation
2/161 British Atomic Research Establishment Modernizes Its Communications
3/303 Capacitor and Ribbon Microphones
3/308 Carbathene, a New Copolymer
3/300 Cathodic Protection of Oil Storage Tanks
2/163 Cathodic Protection of Ship's Hull
3/306 Centralized Control of Protection Switching for Television Networks
1/5 Command and Control System *465L*
4/417 Concorde Aircraft Simulator
3/299 Crossbar *48 IIK 800* Exchange Cut Over
2/163 Crossbar Distributor for Television and Radio Signals
3/303 Data Communication System *GH-201*
3/304 Data Modem *GH-2002*
3/304 Data Modem *GH-4002*
3/310 Data System for Aerial Photography
1/11 Demonstration 6-Gigahertz Radio Link
3/311 Digital Circuit Modules
3/308 Digital Motors
4/420 Digital Radar Bright Display
2/167 Diode-Capacitor Memory
3/310 Double-Ended Noise Generator
4/410 Early Bird Satellite Tested for Record Communication
4/413 Encapsulation Resins with Controlled Thermal Expansion
2/169 Equalizer for Subscriber Telephones
3/297 *ESRO 1* Satellite Under Development
2/167 Export Paystation
1/12 Fast Adaptable Tape Reader
3/310 Fast Analog-to-Digital Encoder
1/8 Ferrites Exhibiting Re-Entrant Loops
1/6 Field Trial of Subscriber Push-Button Sets
3/299 Flying Telephone Switchboard
2/170 French Railroad Information Center
1/12 From Telecommunications to Land Drainage
3/306 Gallium-Arsenide Laser Operates Continuously at 77 Degrees Kelvin
3/298 Geodetic Satellites
2/162 Gerona Telephone Network
4/414 *GH-201* Demonstrated in United States
3/310 High-Repetition-Rate Laser
4/419 High-Speed Data System Transmits Newspaper Copy Across Atlantic
4/417 Infrared Filters
2/161 Infrared Photodiodes for Laser Applications
3/305 Inorganic Film Deposition
4/418 Intercommunication System, Dirigent *2/80*
2/158 International Direct Dialing Initiated in France
4/414 Interpreter Training Facilities
4/412 Ion Laser
3/299 Korea Radio Network Completed
1/7 Lifeboat Rescue Transceiver
2/172 Lightweight Push-Button Intercommunication Set
2/164 Line Concentrator for Use With Carrier Equipment
3/311 London Airport Telephone Switchboard
2/168 Long-Life Sensitive Switch
4/414 Long-Range 3-Dimensional Radar
4/418 Magnetic Marking of Mine Trucks
2/168 Magnetic Thin-Film Experimental Memory
2/159 Malaga Factory Inaugurated
1/9 Microwave System Between London and Lille
2/161 Microwave System Installed in Short Time
2/163 Mobile Radio System for Austrian Police
4/419 Mobile Radiotelephone Set
1/13 Mobile Radiotelephones Aid in Road Maintenance
1/7 New Audio Line Repeating Coils
2/157 New Factories in Spain
2/160 New Headquarters in London
1/5 Nimbus Satellite Takes Photographs in Dark
2/161 Oslo Crossbar Exchanges Cut Over
1/13 P-Addie
3/299 Pentaconta Exchange Works With Rotary in Spain
2/171 Pentaconta Private Automatic Exchanges for Carrier Networks
4/416 Pentaconta Switching for Rumania
2/163 Pneumatic Tube for Schiphol Airport
4/411 Pneumatic Tube Ticket Folder
4/411 Pneumatic Tubes for Hamburg Post Office
2/168 Police Teleprinter Center in Hamburg
4/419 Portable Telephone-Cable Test Set
3/311 Power Unit for Logic Systems
2/165 Precipitators Reduce Air Pollution
2/171 Printed-Circuit-Board Connectors
2/171 Pumps for Chemical Processing
4/411 Push-Button Calling Applied to Step-by-Step Exchange
2/160 Push-Button Subscriber Sets Installed in Germany
4/420 Radiation-Resistant Regulator for Orbiting Reactor
4/412 Radio Altimeter Approved
2/166 Radio-Wire Exchange Equipment
1/5 Railroad Geographic Switching Systems Installed
2/160 Refractometer Cures Radar Mirage
3/309 Remote Control and Indication for Augsburg Power Plant
4/410 Resistance-Capacitance Thin-Film Structure for Frequency Selection
4/415 Satellite Programers Tested in Flight
4/415 Satellite Repeater Uses Single Frequency Conversion
3/297 Satellite Sequence Programers
4/416 Satellite-Tracking Receiver
1/10 Sealed Pump (Without Stuffing Box)
2/165 Selective Calling for *SEM 47* Mobile Radio
3/308 Semipermanent Store
4/418 Silicon Avalanche Rectifier in 10-Ampere Rating
2/167 Silicon Rectifiers on Valve Bases
4/414 Solid-State 4-Gigahertz Transmitter
1/9 Solid-State 7-Gigahertz 24-Channel Radio-Link Equipment
2/170 Speech Quality of Pulse Code Modulation for Telephony
2/163 Static Frequency Converter
2/169 Static Inverters
3/309 Submarine Cable Between Hong Kong and Australia
3/305 Tacan Computer for Off-Track Navigation
1/12 Tape Punch for 5 to 8 Tracks
4/413 Telephone Operator Training for Blind
4/415 Telephone-Traffic Measurement
3/301 Television Channel-Translator Transmitter
1/10 Telex Route Selectors Installed in German Network
2/171 Thermistor for Television Deflection Circuit
3/309 Thyristor Control Units
3/307 Transportable Microwave Radio Terminal, AN/TRC-112
3/298 Two New Exchanges Cut Over in Paris
3/301 Very-High-Frequency Radiotelephone Transceiver
3/301 Videx Image Converter
1/6 Water Vapor in the Atmosphere of Venus
4/416 X-Band Traveling-Wave Tube
